Subject: Talking points for meeting with Shaun

Carl,

Here are the talking points I drafted for the meeting today. We should coordinate in advance on the plan for the briefing.

Dee

Talking points for meeting with Shaun, U&O FIP, October 26, 2015

- Meeting originally scheduled to update you on FIP
- Meeting with Janet last week provided you an update, using this meeting as a follow up

Stakeholder meetings:

- Met with Industry, Enviros, FLMs and Utah County Commissioners
 - Meetings followed similar format, provided overview of HQ oil and gas rules, summarized data from basin (oil and gas operations, emissions, AQ), then allowed time for input from stakeholders.
 - Minimal input from stakeholders,
 - Why rush? Production down, AQ good.
 - Enviros expressed support
 - FLMs want us to go further, specifically on NOx controls
 - Industry contacted us late last week, had given some more thought to meeting and may have some informal comments they would like to share to inform our decisions.

Status of FIP:

- Draft reg text and technical support document currently posted on SharePoint for concurrent HQ and Region 8 technical review. Comments due November 6th.

- FIP, as currently drafted, covers existing sources, similar controls and thresholds as UDAQ

Ask of Shaun:

- Check in on path forward

- Greasing skids at HQ/OP/OMB
